

Tess and the Highlander: Macpherson Clan

RWA RITA Award : Finalist for Best Historical Romance Novel

Tess Lindsay has spent most of her life on the remote Isle of May, uncertain of her identity. Raised by the two sole inhabitants of the island, she is left to fend for herself after their deaths, until a stranger washes ashore in a storm. Tess pulls him from the surf, not knowing that in saving the Highlander she is saving herself. If good looks and a taste for adventure are a curse, Colin Macpherson is destined for ruin. Until he ends up a castaway on Tess's windswept island, he has been roaming the seas, seeking fame, fortune...and a different girl in every port. But his fascination for this strong-willed lass goes beyond her wild beauty, intriguing him as no girl ever has. As Colin gains her trust, Tess reveals what little she knows about herself and her past. From her scant clues, though, Colin comes to one conclusion: he must return Tess to the mainland to reclaim her birthright, even if it means losing her to a destiny that does not include him.

EXCERPT from TESS AND THE HIGHLANDER by May McGoldrick

Added to the shivering that had taken control of Tess's limbs, her teeth were now chattering and she could not stop it. Her clothes were soaked through from her efforts to get the man out of the tidal pool. Her skin was clammy, and she was feeling chilled to the bone. The leather cloak offered some protection against the bitter wind-driven rain, but her body seemed unable to produce any warmth as she lay flat on her stomach on the rocks to the west of the priory. Tess's eyes narrowed as the Highlander finally came out of her house.

She had hoped to go inside and get a blanket or two and some food before fleeing to the caves on the western side of the island. In fact, it was much more than a hope, she corrected. She had to get some supplies before retreating there. Who knew how long the storm surges would require

her to stay hidden or how many days it would be before the Highlanders people would return? Night was quickly dropping its dark cloak over the island. The storm, though, seemed to have shaken off its leash. It was now hammering the island with ten times the fury it had before. A freezing rain had been falling in fits and spurts. It was not a night to be out. He was making a fire. She saw him walk back toward her house a couple of times. Each time he came back carrying armfuls of dry seaweed and driftwood she had diligently gathered, she felt herself growing angrier. And if this wasn't enough, he was building his fire within the area protected by the priory walls. A standing stone wall served as a windbreak. The location kept away the rain. There he was, safe and warm. But there was also no chance of any passing ship seeing his fire. And what was worse, he was building it where she could not possibly get inside her house without being seen by him. She should have left him to swallow more seawater.
